

Assignment 1

Name: Uday Chhina

Student Number: A01210638

15 changes that I would like to make to the BCIT LearningHub system (in no particular order):

1. Add your own events to the calendar inside D2L to make it more useful.
2. Change the layout of the calendar.
3. Add a chat-like app instead of email to chat with peers.
4. Add Dark theme for the entire website.
5. Add the ability to change the name of the courses or give them an alias.
6. Change the email and mobile notifications to have custom timeframes instead of the default 2 days prior.
7. Ability to add or remove widgets from the course home page (class progress, grades, updates, etc.).
8. Update the tasks feature to be its own app instead of being inside the calendar where nobody notices it. Update the UI of the tasks app to be more user friendly in line with most modern tasking or to-do list apps.
9. Add the ability to download multiple course items instead of having to download each of them separately.
10. Add the ability to bookmark items from the table of contents page instead of having to go through each item to bookmark them.
11. Add a "most visited" section at the top of the table of contents to make it easier to get to content items that are used again and again.
12. Ability to add and remove links from the navigation bar to set it up to have a less cluttered look.
13. Show the group members on the assignment page itself if the assignment is in groups instead of having to go hunt for the list of members in some obscure corner of the course page.
14. Add the ability to be able to show more than 20 assignments, quizzes, etc. on a single page.
15. Show more statistics to see progress and performance after each assessment (quizzes, assignments, etc.)
